A SONG WRITTEN FOR HANDSOME

Everything I Saw in Your Eyes

Birthday

We met at a Halloween party at a mutual friend's place,
You reached out and shook my hand, and something changed that day.
I suddenly felt sick as our whole life flashed before my eyes,
A future I could somehow see before I knew the reasons why.

Three years went by before we finally had our first real date,
But from that night, some part of me believed that we could wait.
And everything I saw back then has slowly all come true,
The life that flashed before my eyes became this life with you.

> *Handsome, I never have to question if your love is real,*
> *Even when you're angry, your eyes still tell me what you feel.*
> *You work so hard each day and still keep standing by my side,*
> *Through every part of life, your love has never had to hide.*

I was already fighting illness when our story first began,
And you never walked away from me, you stayed and held my hand.
Through difficult days when I was tired and scared of what came next,
You gave me love in simple ways, without needing to explain it.

We've also lost the people that we wished could still be here,
And carried all those memories through heartbreak and through tears.
Still every time life tested us, you chose to stay with me,
And in your eyes I saw the man I always knew you'd be.

> *Handsome, I never have to question if your love is real,*
> *Even when you're angry, your eyes still tell me what you feel.*
> *You work so hard each day and still keep standing by my side,*
> *Through every part of life, your love has never had to hide.*

I always joked that Elvis would be there when we said "I do,"
Then that day finally arrived, and I was walking down to you.
I saw the tears already waiting in your eyes as I came near,
And I knew that every vision from that first night led us here.

Handsome, I never have to question if your love is real,
After everything we've lived, I know exactly what I feel.
From Halloween to wedding tears, through every changing tide,
The future that I saw that night is standing by my side.

That first handshake showed me more than I could understand,
And all these years later, I'm still grateful for your hand.
