

A SONG WRITTEN FOR SUSAN

Miles to You

Birthday

1:07

3:18

On long drives, we head out to the range
Your laughter makes the whole world change
Your tangled blonde hair catches light
And fills the road with warm delight
Your kind heart keeps the miles in tune
We drive beneath a patient moon

*Susan, I loved you from afar
For fifteen years beneath each star
I cherish your culture every day
My waiting's done, you're here with me to stay*

When clouds would gather overhead
Your kind heart held me through the night
The tough days filled our minds with dread
Your laughter brought the morning light
For fifteen years from far away
I kept this love so close to me
Now all those miles have slipped away
And you are here, where you should be

*Susan, I loved you from afar
For fifteen years beneath each star
I cherish your culture every day
My waiting's done, you're here with me to stay*

On your birthday, I'll hold you near
And thank the road that brought you here
I'll keep you close through cloud and sun
At last, our loving has begun

*Susan, I loved you from afar
For fifteen years beneath each star
I cherish your culture every day
My waiting's done, you're here with me to stay*

*Your laughter rides the open road
My heart comes home wherever you go*
