

A SONG WRITTEN FOR KRISTEN

Guiding Light

Just because

1:01

3:00

We met at Winston Prep Marin one day
To see if school could fit my way
Coordinate graphing brought me fear
You made math fun that first school year
With patience, silliness, and care
You helped me find the strength that's there

*Kristen, without you, where would I be?
You made the hard days feel less long
You saw the strength I couldn't see
I found my way—you believed all along*

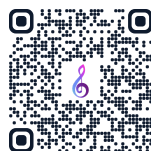

For two years, Focus helped me grow
You taught me how my own mind flows
We had fun with listening to music eating
chocolate and cookies in Focus
By email, text, Zoom, or phone
You make sure I am not alone
When college felt a world unknown
You helped me make that path my own

*Kristen, without you, where would I be?
You made the hard days feel less long
You saw the strength I couldn't see
I found my way—you believed all along*

Just because, I need you to know
Your trust in me still helps me learn
and grow
I'll keep your encouragement near
To make the hard roads feel more clear

*Kristen, without you, where would I be?
You made the hard days feel less long
You saw the strength I couldn't see
I found my way—you believed all along*

*Your light still finds me when I roam
You helped me make this path my own*
