

A SONG WRITTEN FOR ANDREW

Eternal Galaxy Love

Just because

1:16

3:43

When we first met, I was hurting inside
Your gorgeous smile made shadows subside
Those galaxy eyes gave me their light
Your kindness held me close that night
You put me first with a beautiful heart
And showed me love right from the start

*Andrew, I gave my heart to you
Our love will last our lifetimes through
I knew it was eternity
In any universe, you and me*

Four weeks after you moved away
You called to ask if love was true
I said, "I really love you," that day
Then, "I am coming home," said you
An accident almost took you away
But we came through it, side by side
Now I am ill, yet day by day
We'll get through this, with love our guide

*Andrew, I gave my heart to you
Our love will last our lifetimes through
I knew it was eternity
In any universe, you and me*

No special day, just this for you
A simple song from heart to heart
I'll choose your hand in all we do
No universe can pull us apart

*Andrew, I gave my heart to you
Our love will last our lifetimes through
I knew it was eternity
In any universe, you and me*

*Your galaxy eyes still shine so bright
And home is found within their light*
