A SONG WRITTEN FOR JENNIFER

Beauty's First Light

Birthday

Late at night, we'd let the hours unfold
In quiet talks, our little truths were told
Each day, your texts would find their way to me
Each answer felt like sweet company
Your sparkling eyes could make the whole room glow
Your smile made every shadow let me go

> *Jennifer, your eyes hold sunrise's other side*
> *In them, a beauty no dream could ever hide*
> *Your smile brings beauty's first light to my day*
> *Forever, you're my first light, lead the way*

You wear your grace with effortless style
Hard work still leaves you that beautiful smile
There's beauty shining from so deep within
That inner light is where your grace begins
When evening falls, we hold each other tight
Snuggled close, we make the dark feel light
You are more beautiful than dreams to me
The real surprise is all the beauty I see

> *Jennifer, your eyes hold sunrise's other side*
> *In them, a beauty no dream could ever hide*
> *Your smile brings beauty's first light to my day*
> *Forever, you're my first light, lead the way*

You make it easy to speak my mind
Your gentle way is patient, warm, and kind
You're always there whenever I need you near
That constant care makes every moment clear
Your elegance is lovely in the light
Your inner beauty makes the evening bright
Jennifer, your love means so much to me
In every look, your truest self I see

> *Jennifer, your eyes hold sunrise's other side*
> *In them, a beauty no dream could ever hide*
> *Your smile brings beauty's first light to my day*
> *Forever, you're my first light, lead the way*

On your birthday, may this day shine bright
I hope you feel how much you are my light
I'll be there, as you have been for me
With every word, with all the warmth I see

> *Jennifer, your eyes hold sunrise's other side*
> *In them, a beauty no dream could ever hide*
> *Your smile brings beauty's first light to my day*
> *Forever, you're my first light, lead the way*

At night held close as the world fades away
Your smile still carries beauty's first light
