A SONG WRITTEN FOR EVA

Heart's Own Light

Just like this

1:16 3:43

In Rhodes, I missed you far away
But kept your smile through every day
You were the child who never cried
Your constant smile was by my side
That little light still guides me through
My heart has always turned to you

> *Eva, you mean more than words can say*
> *My sunshine through each distant night*
> *Your love still warms my every day*
> *You are my heart's own light*

Born in Novi Pazar, my light
You make my mother's heart take flight
Now in Norway, I look afar
You're in Bulgaria, my bright star
Each day, this missing lives with me
It's part of all our history
An architect, you build with grace
I see your light in every space

> *Eva, you mean more than words can say*
> *My sunshine through each distant night*
> *Your love still warms my every day*
> *You are my heart's own light*

One day, I hope we're closer still
I'll hold you close, I always will
Until that day, my love will stay
Forever with you, come what may

> *Eva, you mean more than words can say*
> *My sunshine through each distant night*
> *Your love still warms my every day*
> *You are my heart's own light*

Across the distance, feel me near
My love will find you, bright and clear
